

GET TO KNOW

Newfoundland and Labrador's NONPROFIT SECTOR

This infographic is based on Statistics Canada data and there may be discrepancies between this data and data from other sources, including provincial statistical agencies. Newfoundland and Labrador's diverse nonprofits and charities have a critical impact on the economy and health and wellbeing of people across the province. They offer valuable programs and services ranging from poverty-relief, housing, and health, to arts, employment, and education.

We live in a caring province:

46%

of Newfoundland and Labrador residents volunteer, contributing a total of 33 million volunteer hours annually.⁷

The sector creates meaningful jobs:

The nonprofit sector as a whole employs 41,000 people in Newfoundland and Labrador, 75% of whom are women, with community nonprofits employing 7,000 people.⁵

There are three broad categories of nonprofits:

Community nonprofits¹ provide goods and services such as social services, advocacy, arts, and sports and recreation to individuals and households.

Business nonprofits include chambers of commerce and business and professional associations.

Government nonprofits include hospitals, public school boards, universities and colleges.

Contribution to Newfoundland and Labrador's GDP²

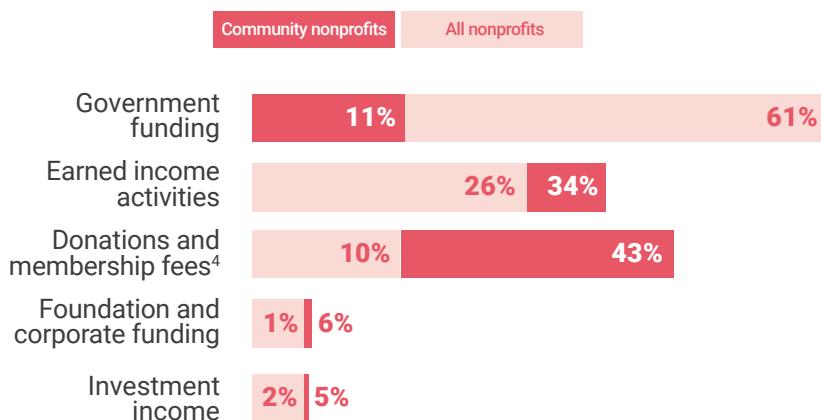

10% = \$3.3 billion

The nonprofit sector in Newfoundland and Labrador contributes 10% to the province's GDP, constituting \$3.3 billion in economic impact. Community nonprofits contribute \$296 million, constituting 0.9% of Newfoundland and Labrador's GDP.²

Average salaries in Newfoundland and Labrador⁶

How are nonprofits in Newfoundland and Labrador funded?³

¹ Community nonprofits are called "nonprofit institutions serving households" by Statistics Canada.

PROVINCIAL AND TERRITORIAL

NONPROFIT SECTOR INFOGRAPHICS

CONTEXT

Nonprofits are key drivers of economic and social development: they provide essential programs and services, offer meaningful employment opportunities, and enhance social connections by mobilizing volunteers. This series of infographics offers a glance at the scale of economic and social impacts of the nonprofit sector in each province and territory, based on Statistics Canada data. Up-to-date data about the nonprofit sector facilitates a deeper understanding of how the sector contributes to Canadian society, and allows the sector to better demonstrate their impact, plan for workforce needs and advocate for change. We encourage you to use these infographics to showcase the impact of the nonprofit sector, whether to governments, funders or other stakeholders.

LIMITATIONS

1. This infographic uses 2018 & 2019 data from Statistics Canada, and therefore does not reflect the impact COVID-19 has had on the nonprofit sector. For example, nonprofits lost a massive number of volunteers during the pandemic. We chose to use pre-pandemic data because rapid economic changes during the pandemic created frequent substantial changes in macroeconomic stats and data from 2020 and 2021 was therefore both subject to revision and likely to become outdated quickly. We invite you to review the more recent data on Statistics Canada's website:
 - [Non-profit institutions and volunteering: Economic contribution, 2019 and first quarter to fourth quarter 2020](#)
 - [Non-profit institutions and volunteering: Economic contribution, first quarter 2021](#)
 - [Non-profit institutions and volunteering: Economic contribution, second quarter 2021](#)
2. The ongoing data deficit about the nonprofit sector means that there is no reliable, comprehensive data on the number of nonprofit organizations, the populations they serve, or who they employ.² Additionally, there are some discrepancies in data collected by provincial statistical agencies and data collected by Statistics Canada. Statistics Canada also does not track unincorporated grassroots organizations, so their information is not captured in this series of infographics.
3. This infographic only contains a provincial/territorial breakdown of the data, as Statistics Canada does not collect data on a local or regional level. For data on nonprofits at a local level, check out your municipality's website. We encourage you to advocate to all levels of government for better data collection on the sector.
4. Data about volunteerism and average salaries is not available for the territories.
